PORTFOLIO

YUVARAJ -BIM MODELLER

ABOUT ME

BIM MODELLER

HI I'M YUVARAJ

A passionate BIM specialist with a background in Civil Engineering. I thrive on leveraging technology to improve project efficiency and collaboration. With experience in softwares like Revit, AutoCAD and Navisworks, I enjoy tackling complex challenges and delivering innovative solutions. I'm excited about the future of digital construction and always eager to learn and grow in this dynamic field.

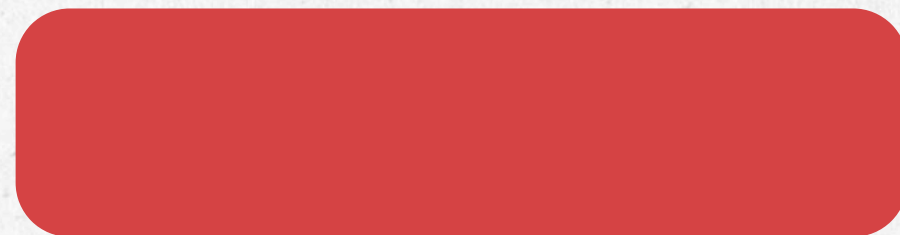

PROFESSIONAL SUMMARY

- BIM EXECUTION PLAN (BEP)
- BLUE BEAM |BIM360|
- Collaboration & Coordination |NAVIS|
- 3D Visualization |CAD TO BIM| |SCAN TO BIM| |ID|
- Detailed Design |LOD100-LOD350-LOD400| |COBie|
- Civil, Structure, Arch Modelling |Documentation| |RFI|

EXPERIENCE

OMNIX INTERNATIONAL – DUBAI

BIM MODELLER

DECEMBER 2025 – PRESENT

- Prepared GA Plans, RCP Plans, Elevations, and Section Views for project deliverables..
- Conducted clash detection and participated in coordination meetings to resolve design conflicts.
- Handled wall coordination and RCP layouts based on design updates and site requirements.
- Raised RFIs for design Issues and tracked resolutions.
- Prepared and submitted daily progress reports and weekly status reports.

EXPERIENCE

INFINEVOD –INDIA

BIM MODELLER

FEB 2022 – DEC 2025

- Developed and maintained 3D BIM models for various projects, ensuring accuracy and adherence to industry standards.
- Collaborated with architects and engineers to coordinate designs and resolve clashes using Navisworks.
- Participated in client meetings to present model visualizations and gather feedback for design iterations.
- Develop and manage Revit families, parametric components, and worksets to support efficient project workflows and maintain modeling standards.
- Optimized workflows through effective use of BIM technologies, enhancing project efficiency.

PROFICIENCY IN BIM SOFTWARE

- Autodesk Revit – Core tool for architectural
- Navisworks – Model coordination, clash detection
- AutoCAD – 2D drafting and BIM integration

Understanding of Construction and Design Principles

- Familiarity with construction sequencing, and standards.
- Ability to interpret and translate design intent into 3D models.

BIM Coordination

- Coordinating multi-discipline models and resolving clashes

Data Management and Documentation

- Creating schedules, quantity takeoffs, and construction documents.

Knowledge of Design Software and Others

- 3Ds Max – Basic 3D modeling
- MS Office, Bluebeam – Documentation and presentations

EDUCATION

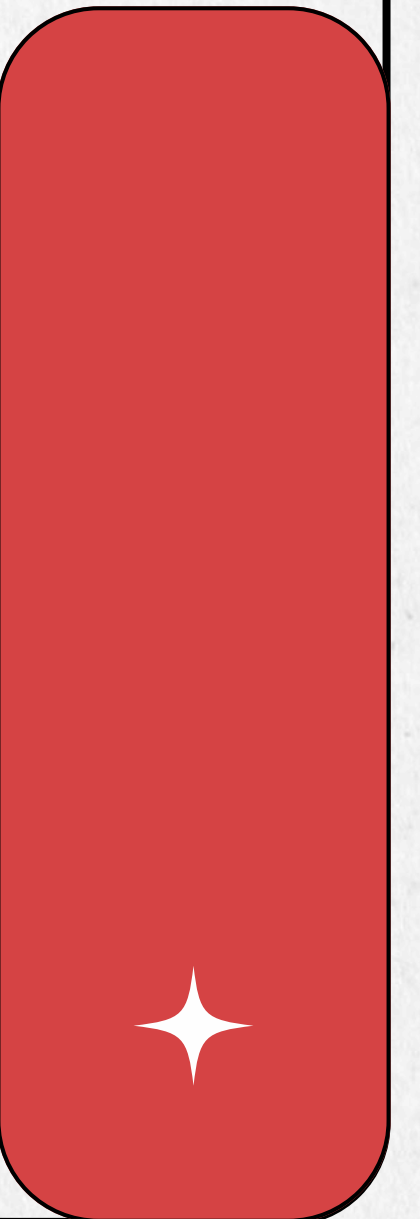

- B.E (CIVIL) 7.66%
Kings College Of Engineering Punalkulam,
Pudukottai (Anna University)
2017-2021
- HSC 72%

PROJECT HANDLED

- Nawayef Souq - Hudayriyat Island in Abu Dhabi -LOD 200
- SEA HAVEN- Dubai Harbour, Dubai -LOD 400
- QIDDIYA HQ RIYADH,SAUDI ARABIA -LOD-300-400
- ALDAR MANARAT-PHASE-2 Residential Building,
Abu Dhabi -LOD 400
- Commonwealth Bank of Australia (CBA) - LOD 400
- RED SEA GLOBAL, Bahrain -LOD 400
- QATAR MEDIA- AM,FM,QTV BUILDING - LOD 200
- BROOKFIELD MALL,KOLKATA -LOD 350

PROJECT 1

Nawayef Souq, Abu Dhabi

Town House (Cluster)

- Scope of Work – Architecture/ID
- Model Reference: As per CAD Updation.
- LOD: Level of Development- 200
- Work Area:
- Basement
- Ground Floor
- First Floor

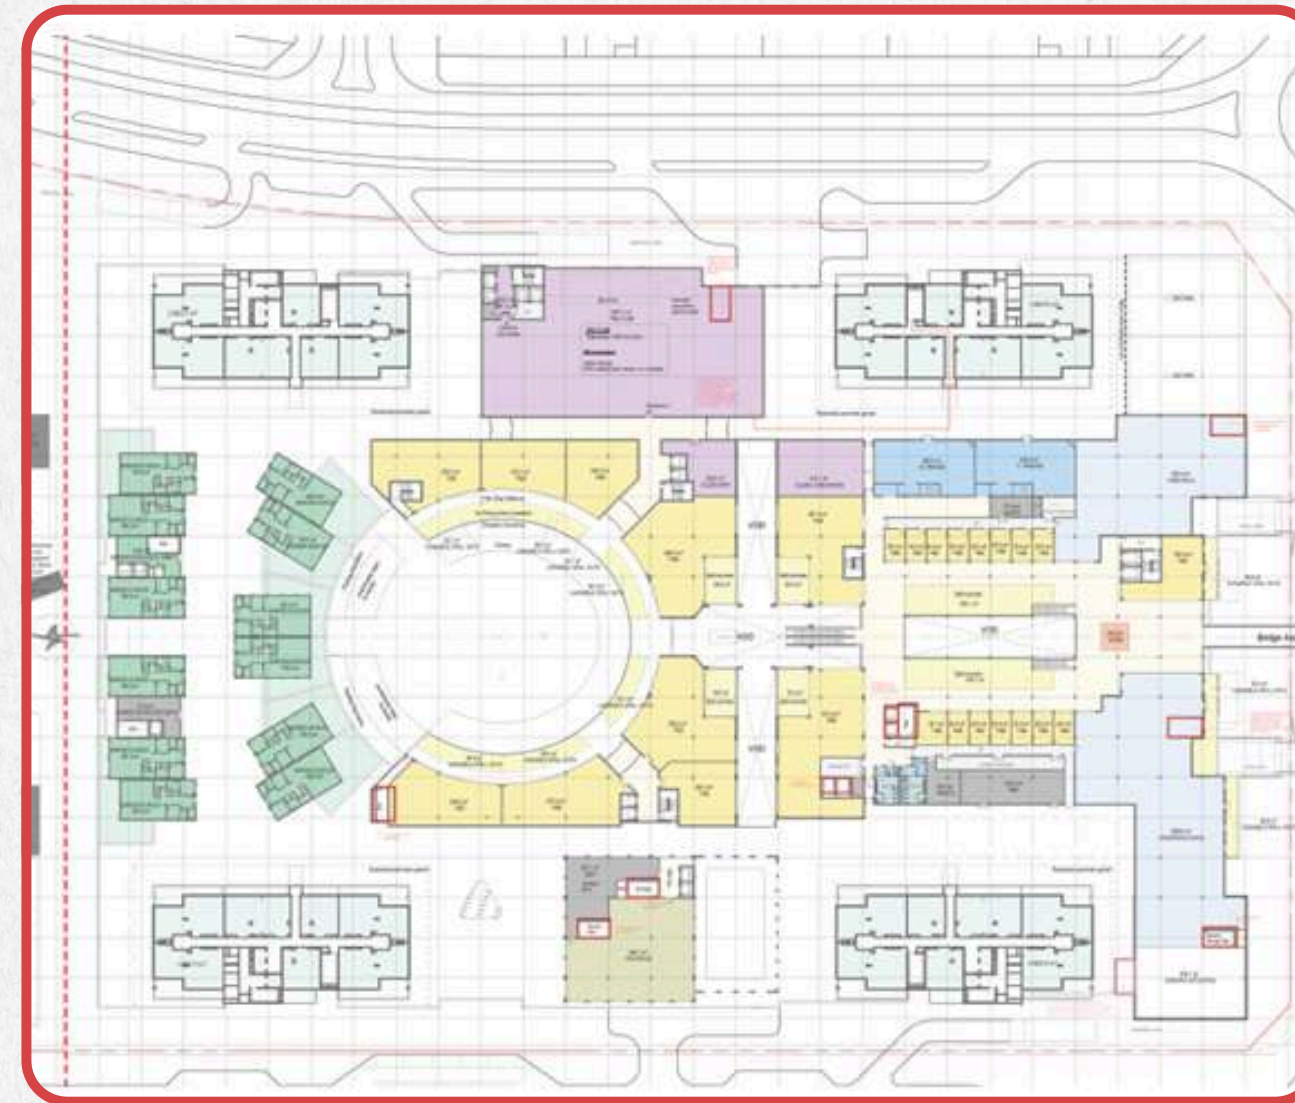

PROJECT 1

GROUND FLOOR-GA PLAN

FIRST FLOOR-GA PLAN

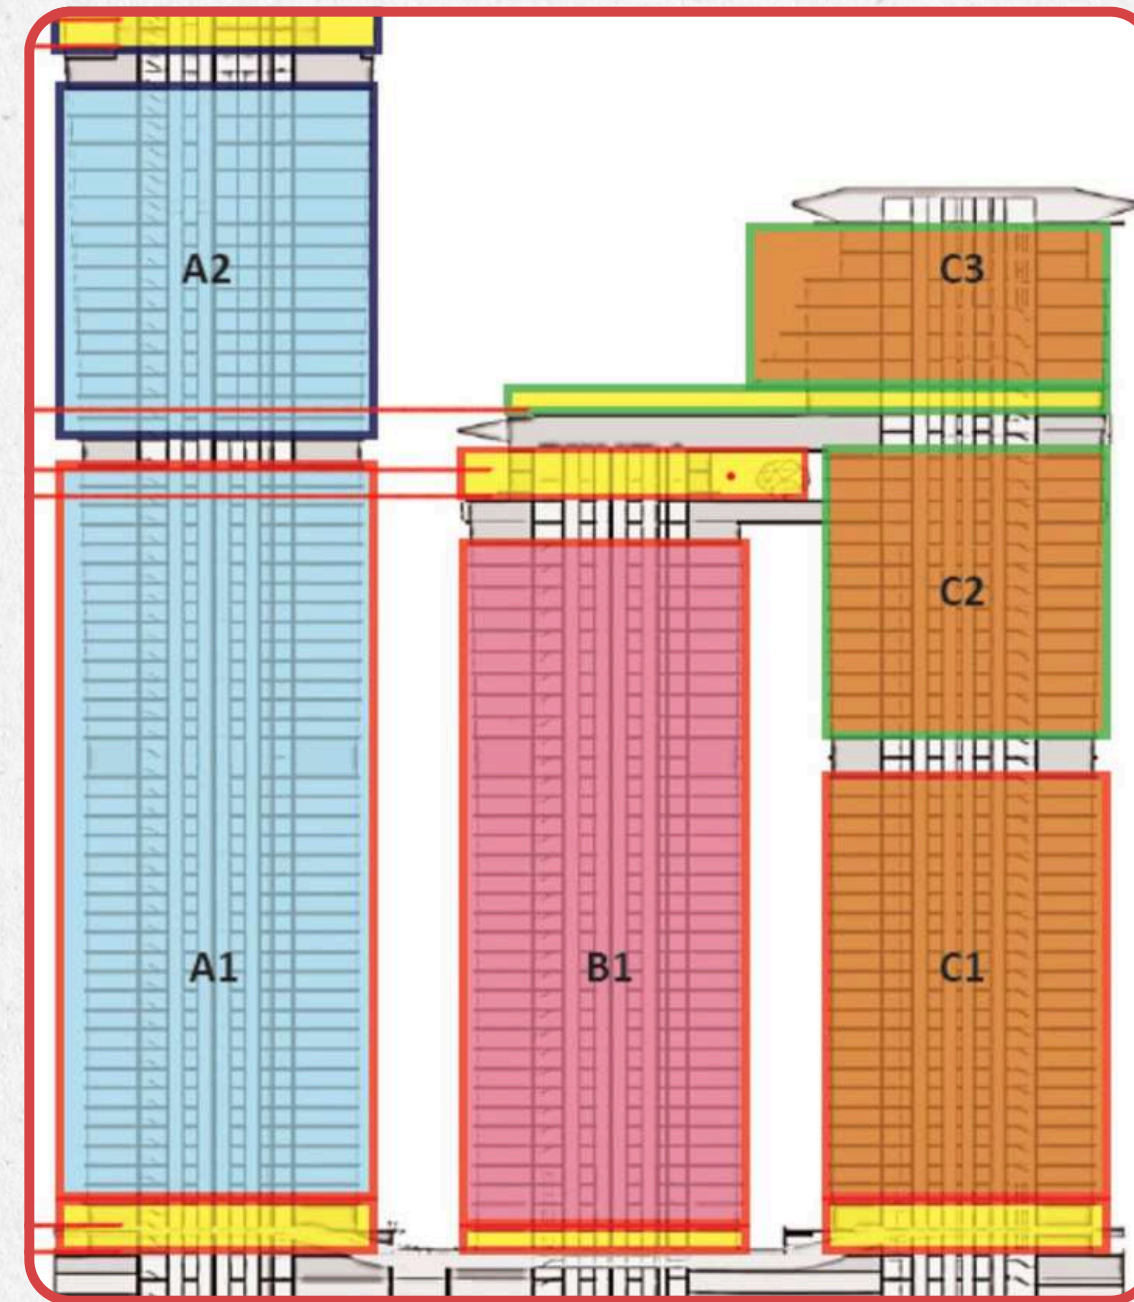

PROJECT 2

SEA HAVEN Dubai Harbour, Dubai

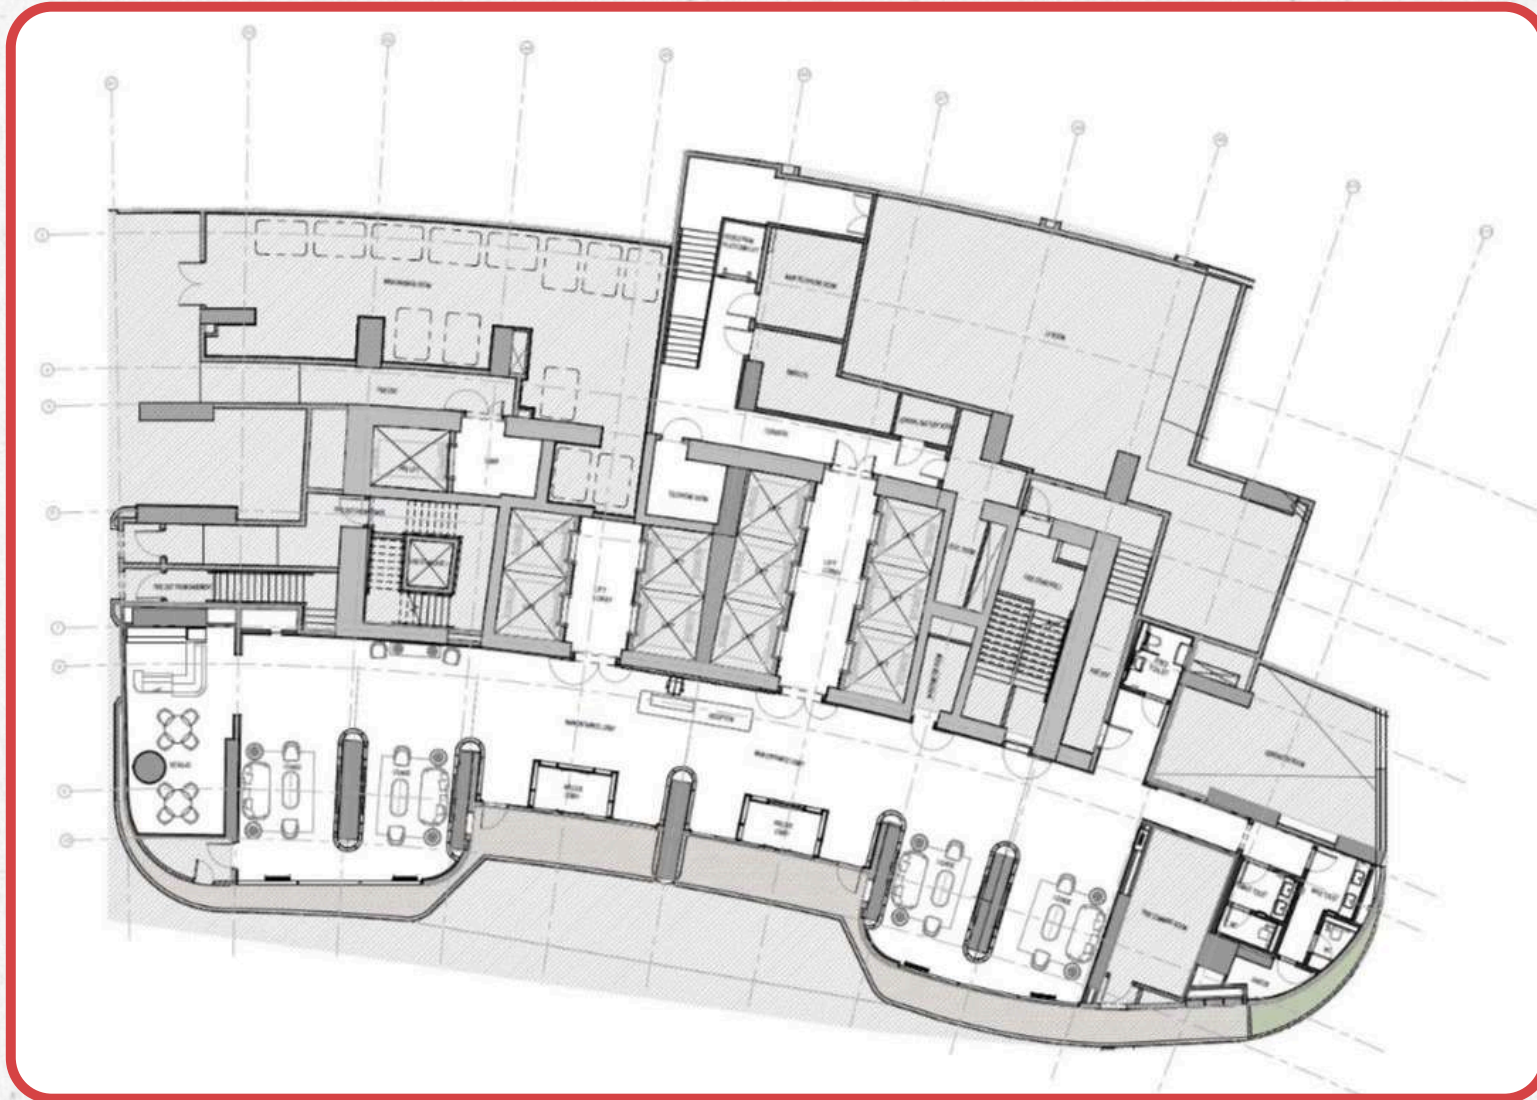

RESIDENTIAL COMPLEX

- Scope of Work – Amenities Area
- Model Reference: All disciplines linked into a coordinated BIM model
- LOD: Level of Development- 400
- Work Area:
- Tower A – 58 Levels
- Tower B – 38 Levels
- Tower C – 40 Levels
- Amenities – Podium / Ground Level Facilities (Pool, Gym, Clubhouse, Lounge)

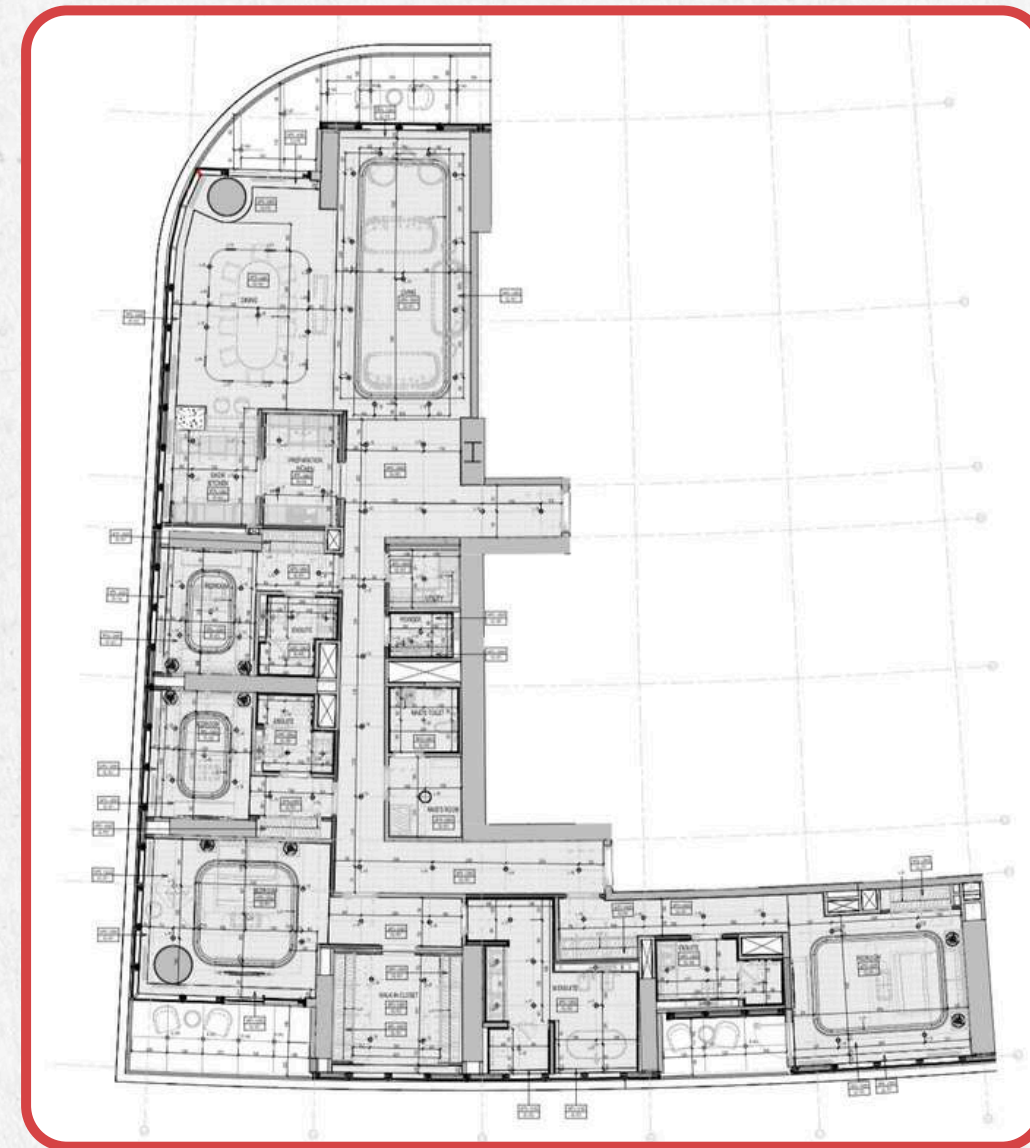

PROJECT 2

GROUND FLOOR-LOBBY PLAN

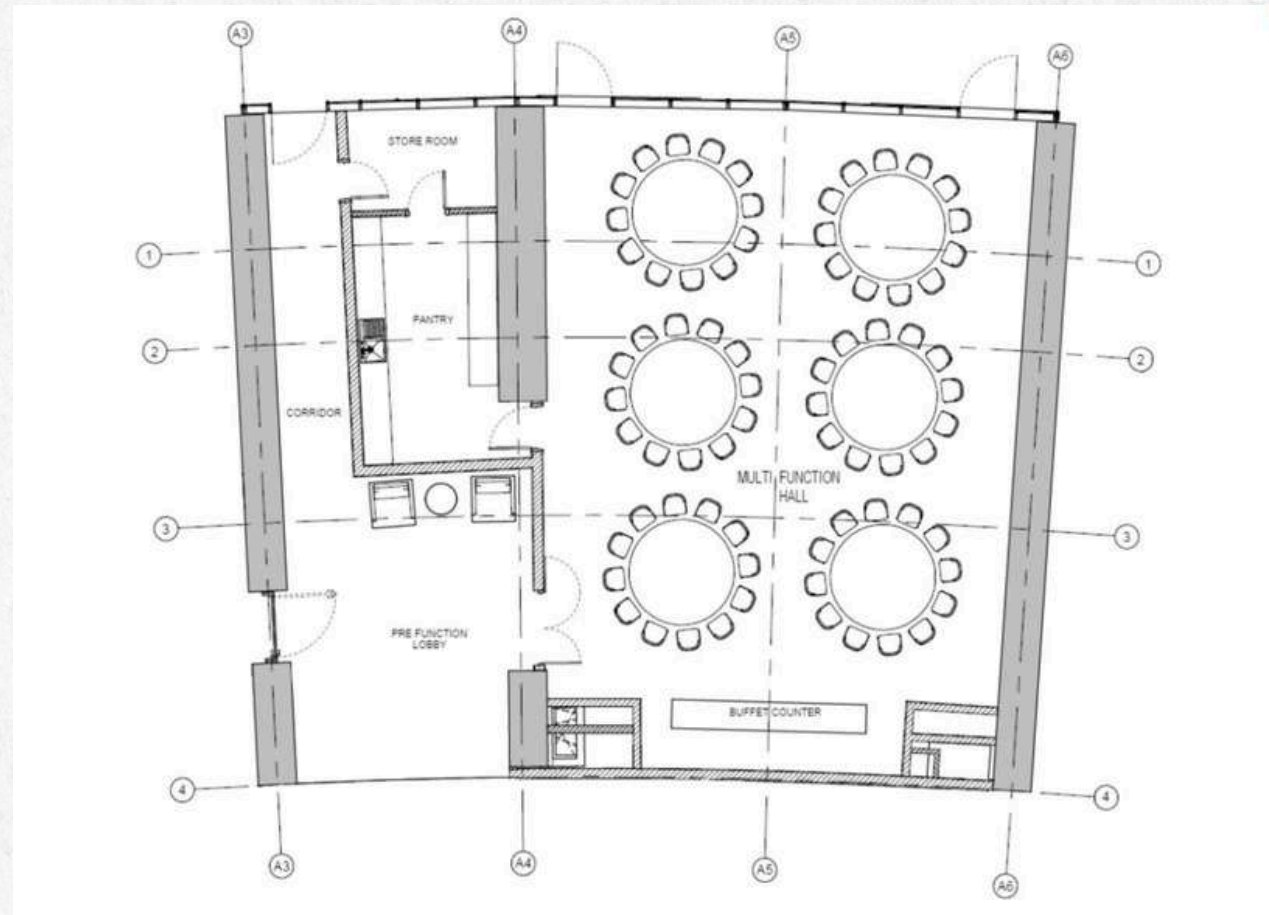

4 BED TYPE-A -CEILING PLAN

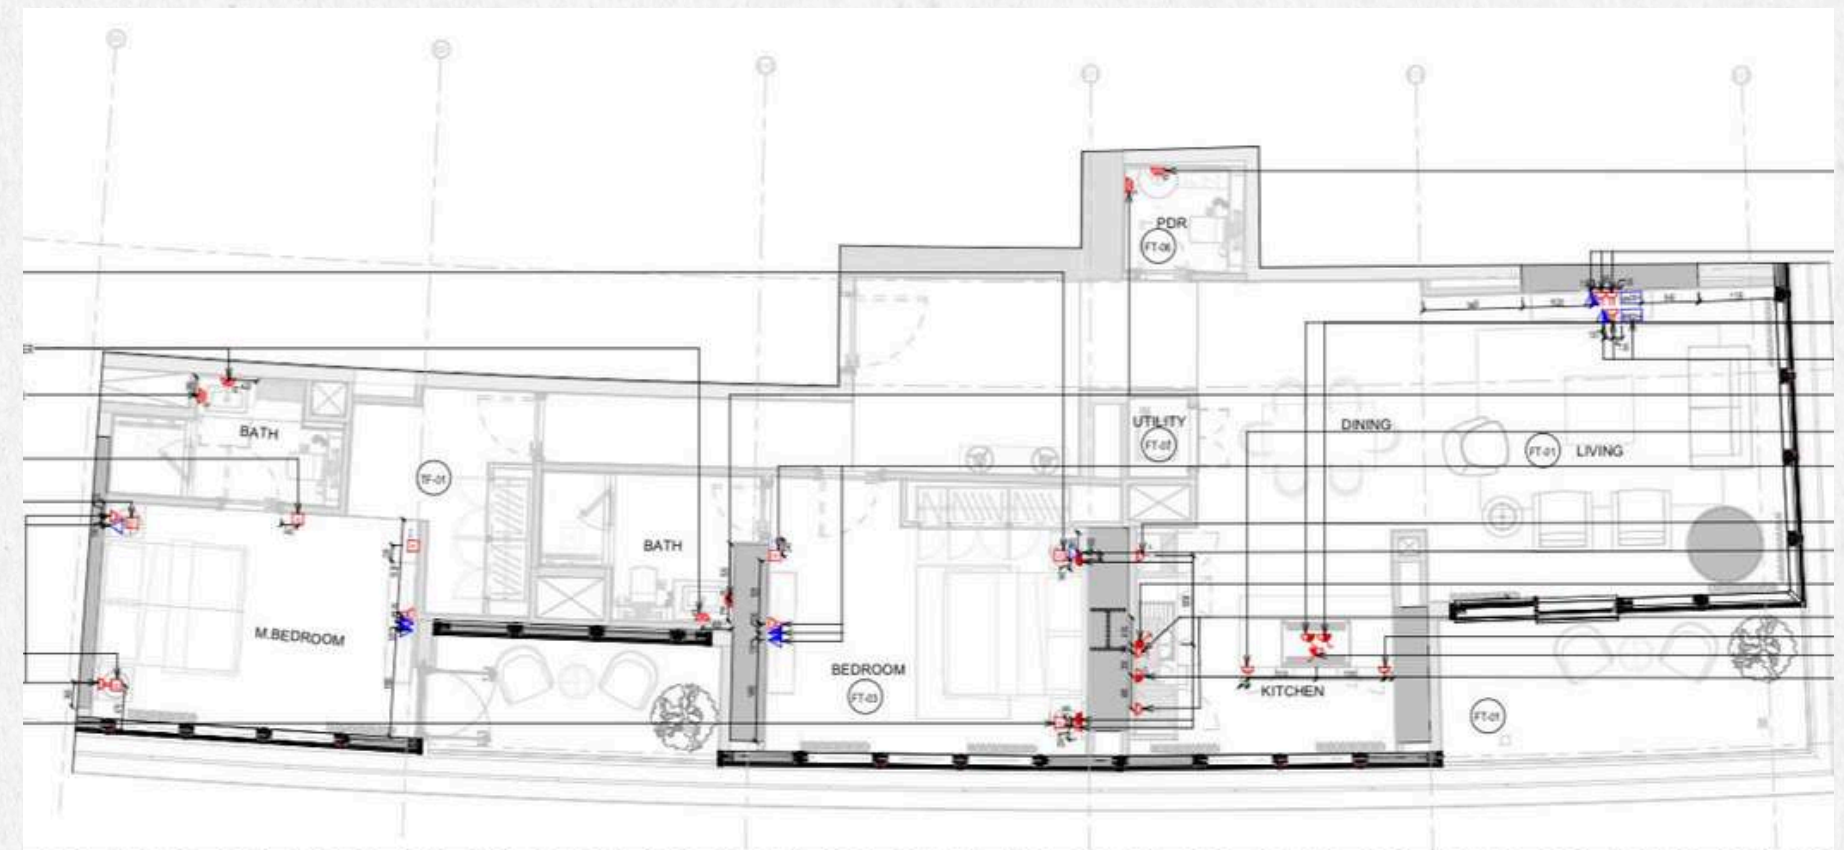

PROJECT 2

MULTIFUNCTIONAL HALL

WALL COORDINATION-PLAN

PROJECT 3

ALDAR MANARAT PHASE-2

HIGH RISE BUILDING

- Scope of Work – Architectural & Facade
- Model Reference: All disciplines are linked files into the main architectural model.
- LOD: Level of Development- 400
- Work Area: G+12 building with studios and 1-3 bedroom apartments.

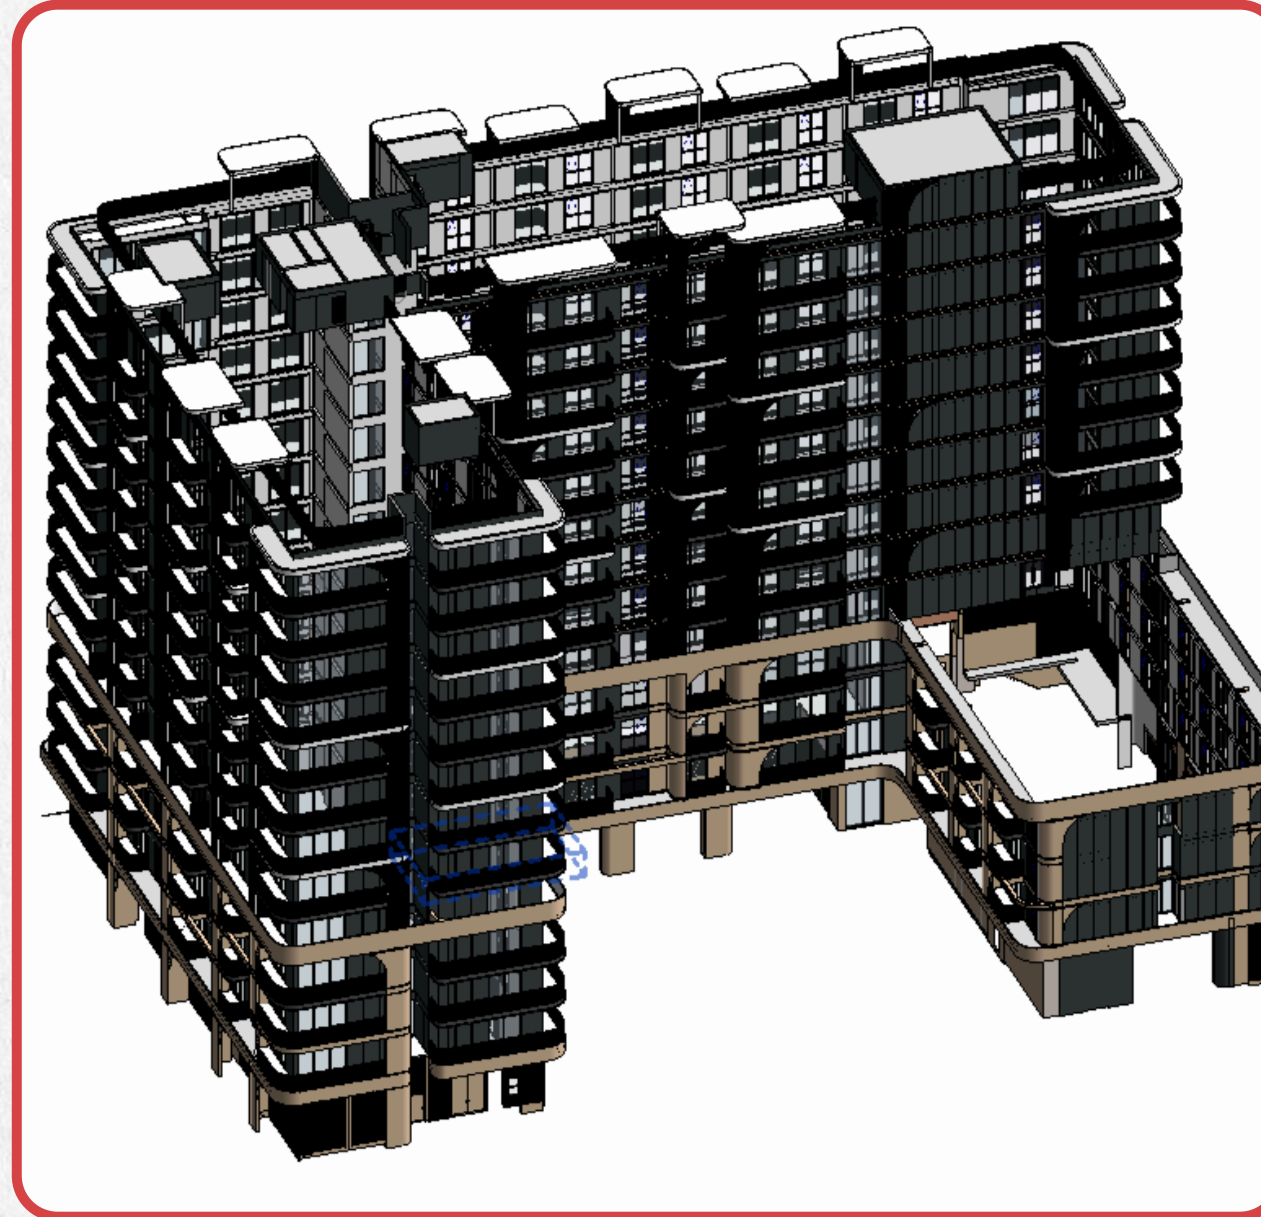

PROJECT 3

Clash reports are submitted to the client on a daily or weekly basis, depending on the stage and intensity of coordination activities. This ensures timely resolution and continuous model alignment.

PROJECT 4

COMMON WEALTH BANK OF AUSTRALIA (CBA)

Scope of Work – Sheet Work

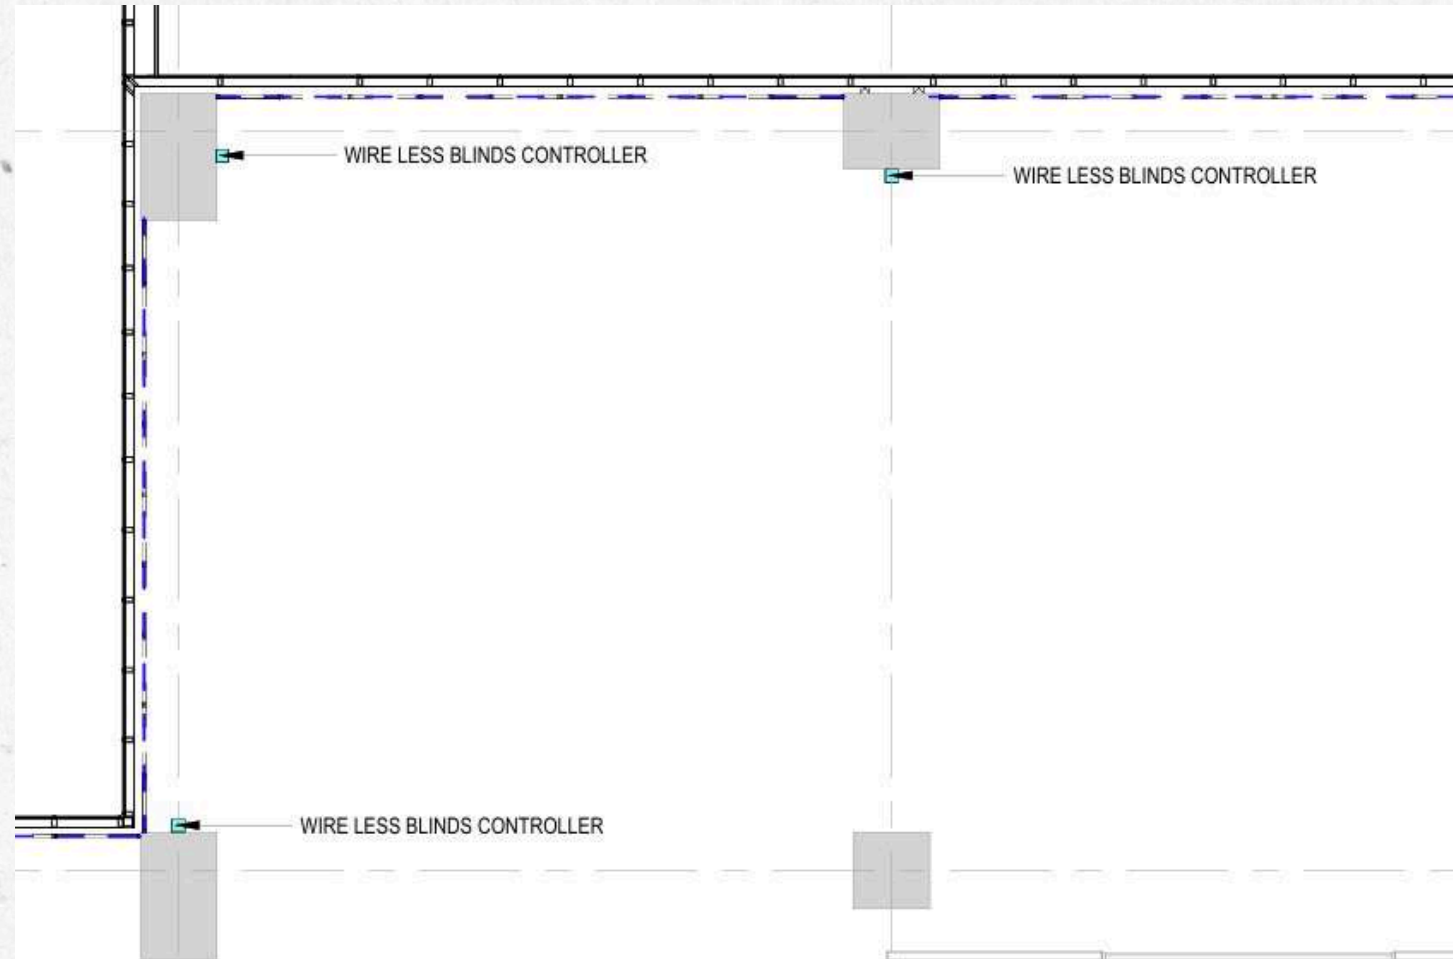

- Project Scope: Sheet work submission as per client instructions.
- Sheet Includes: Millwork, Blinds, Floor Finishes, Table & Chair Alignment
- COBie: COBie details maintained in all relevant sheets.
- Submission Format: As per client-approved template.
- Quality Check: All sheets QC-verified before submission.

PROJECT 4

BLIND-PLAN VIEW

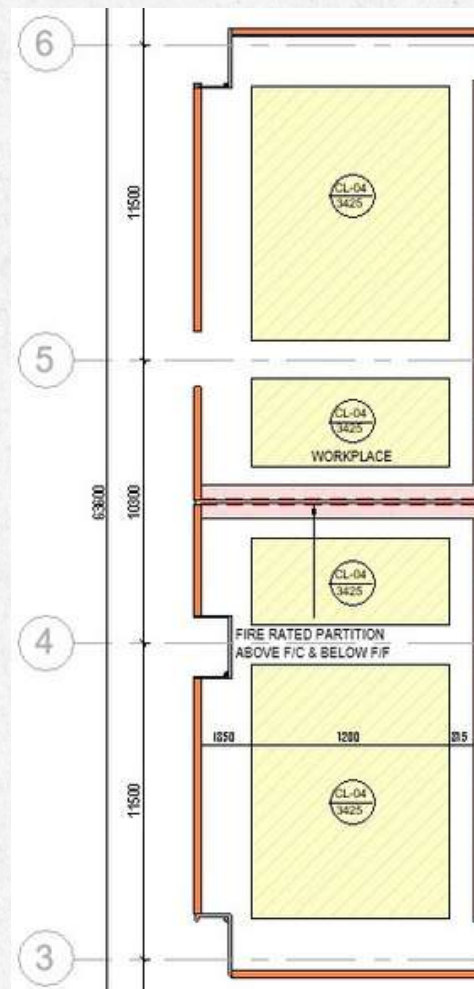

3D-VIEW

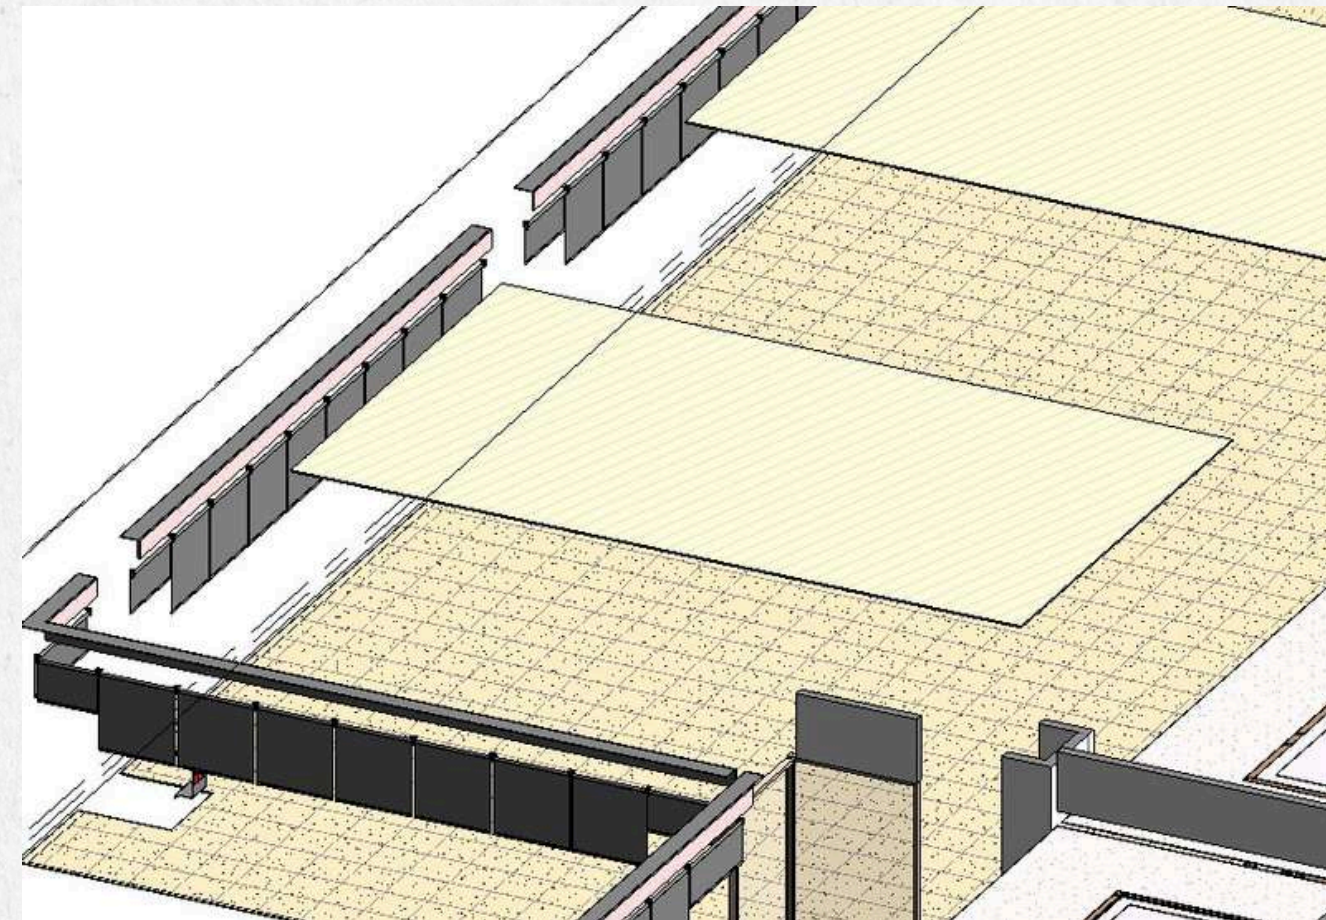

Blinds were created and placed as per the design, with alignment verified through section views for accurate positioning.

PROJECT 4

FALSE CEILING -DETAILS

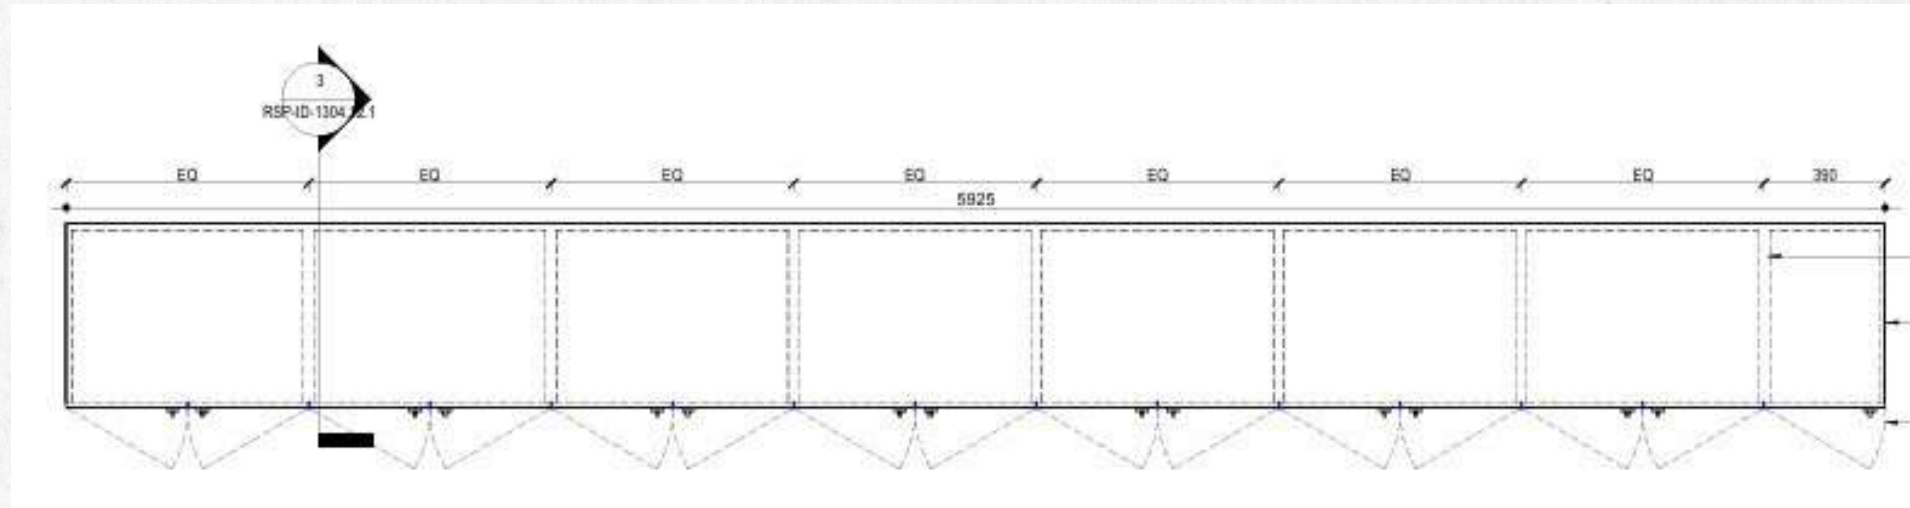

3D-VIEW

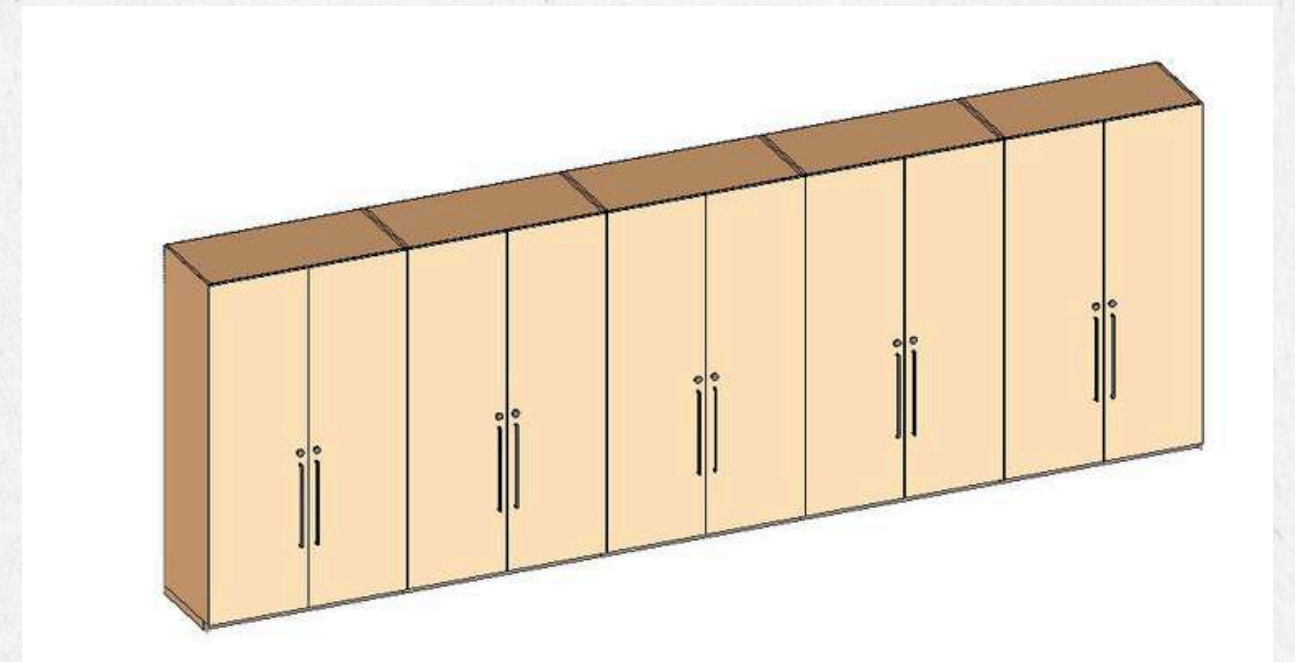

Align the false ceiling layout across all relevant drawings to ensure consistency and coordination with architectural and MEP elements. Generate and review 3D views to verify False ceiling levels.

PROJECT 4

MILLWORK-DETAILS

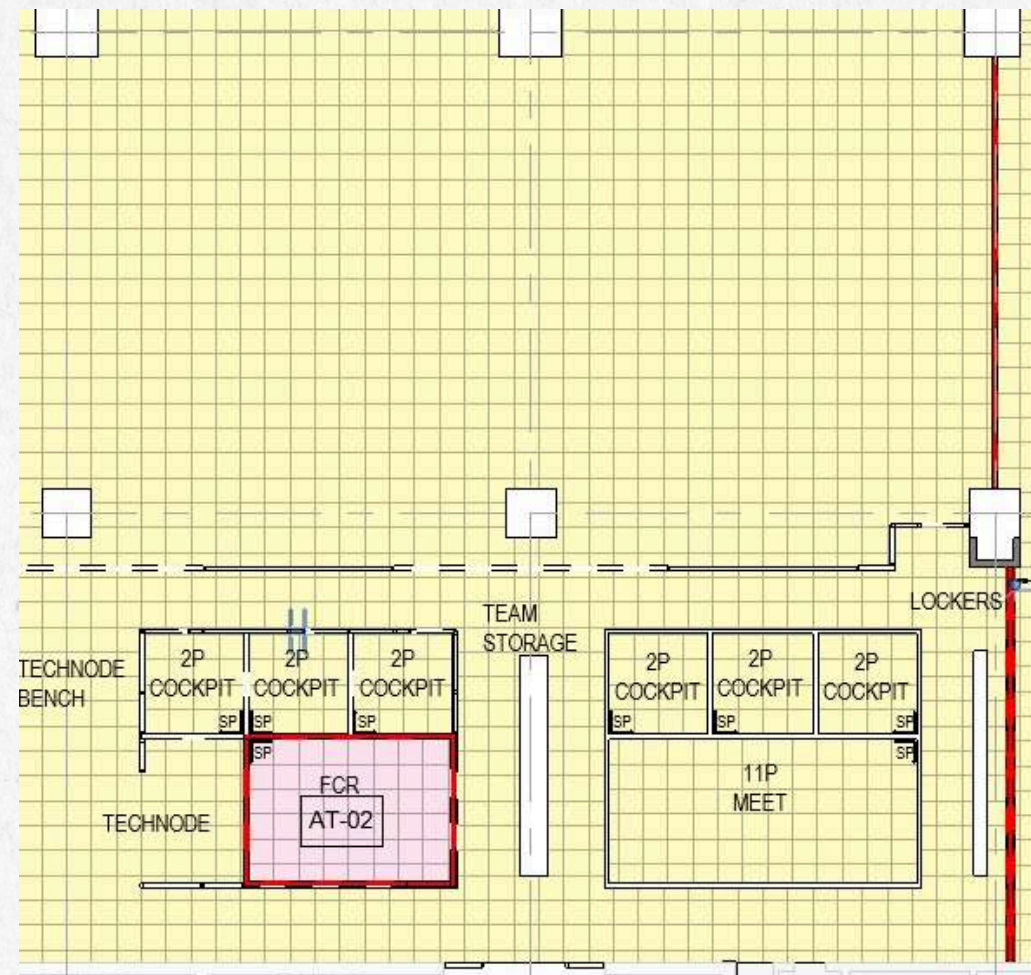

3D-VIEW

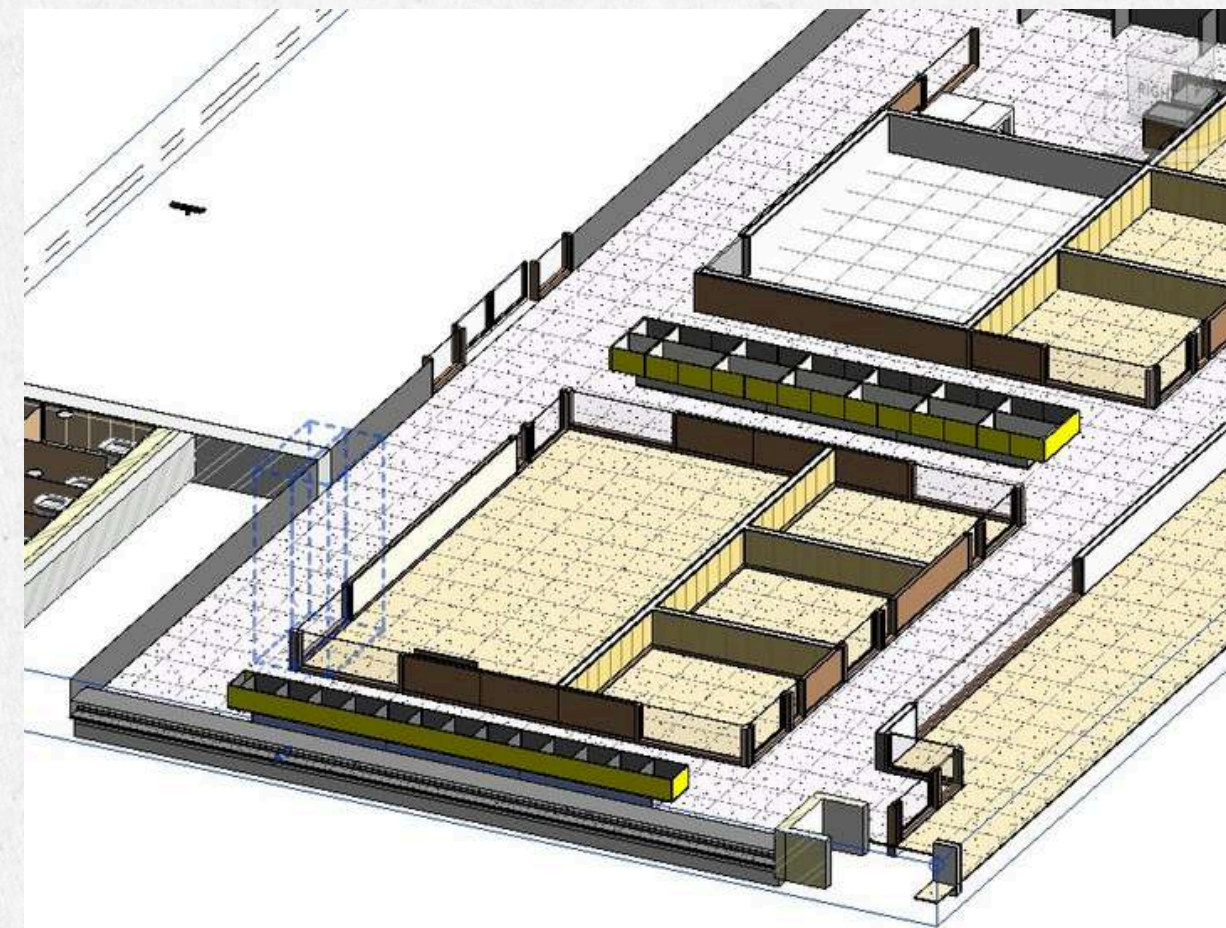

Millwork details were provided by the client. Families were created and dimensions followed as per the reference PDF. All details have been implemented and updated accordingly.

PROJECT 4

FALSE FLOORING -DETAILS

3D-VIEW

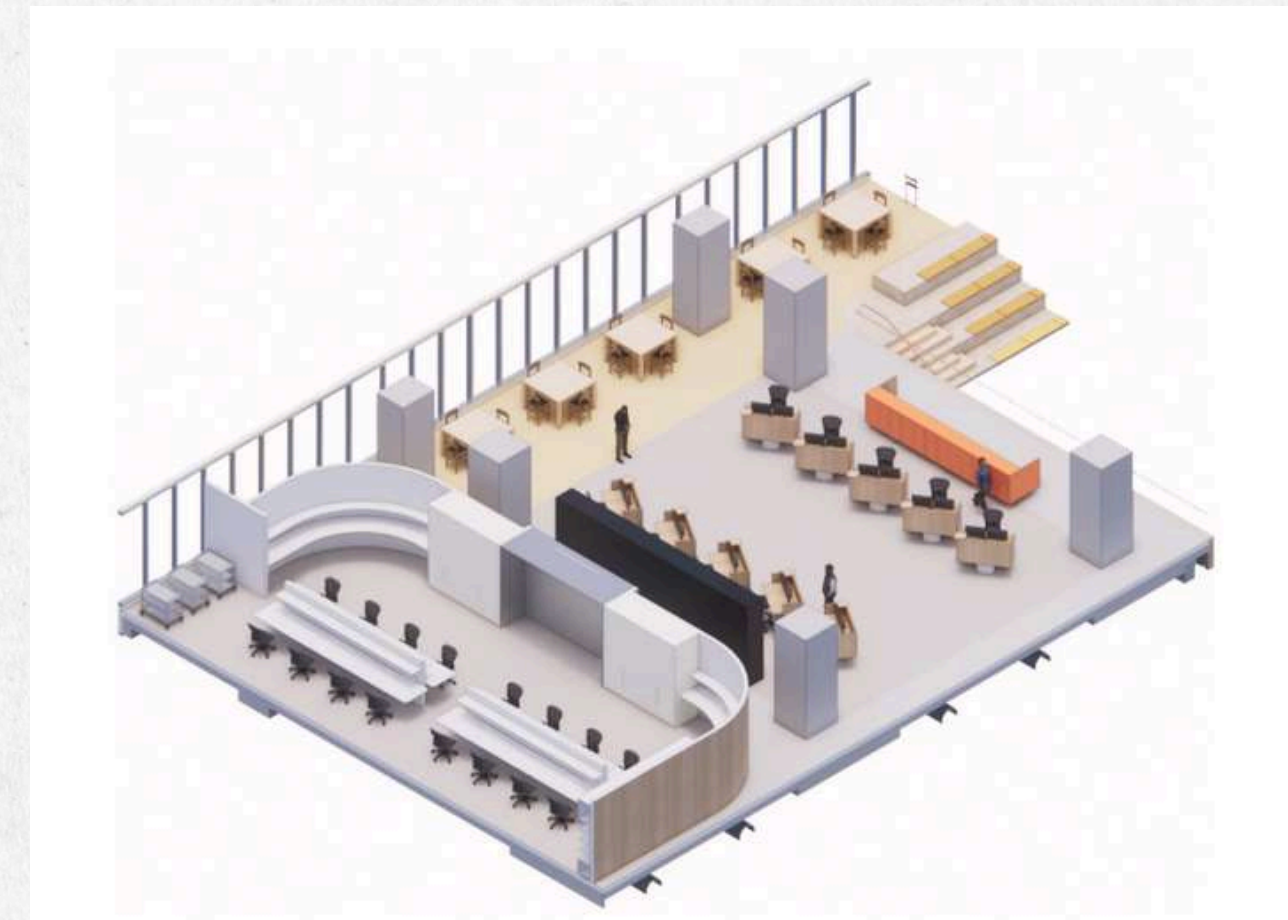

**Verify tag placement and flooring layout as per client requirements.
Replace or adjust Floor where it is necessary.**

PROJECT 4

FURNITURE- SCHEDULE

REF-VIEW

Developed and submitted a comprehensive furniture schedule as per client instructions, ensuring accuracy in dimensions (length, width, height), material specifications, and quantity details.

PROJECT 5

RED SEA GLOBAL

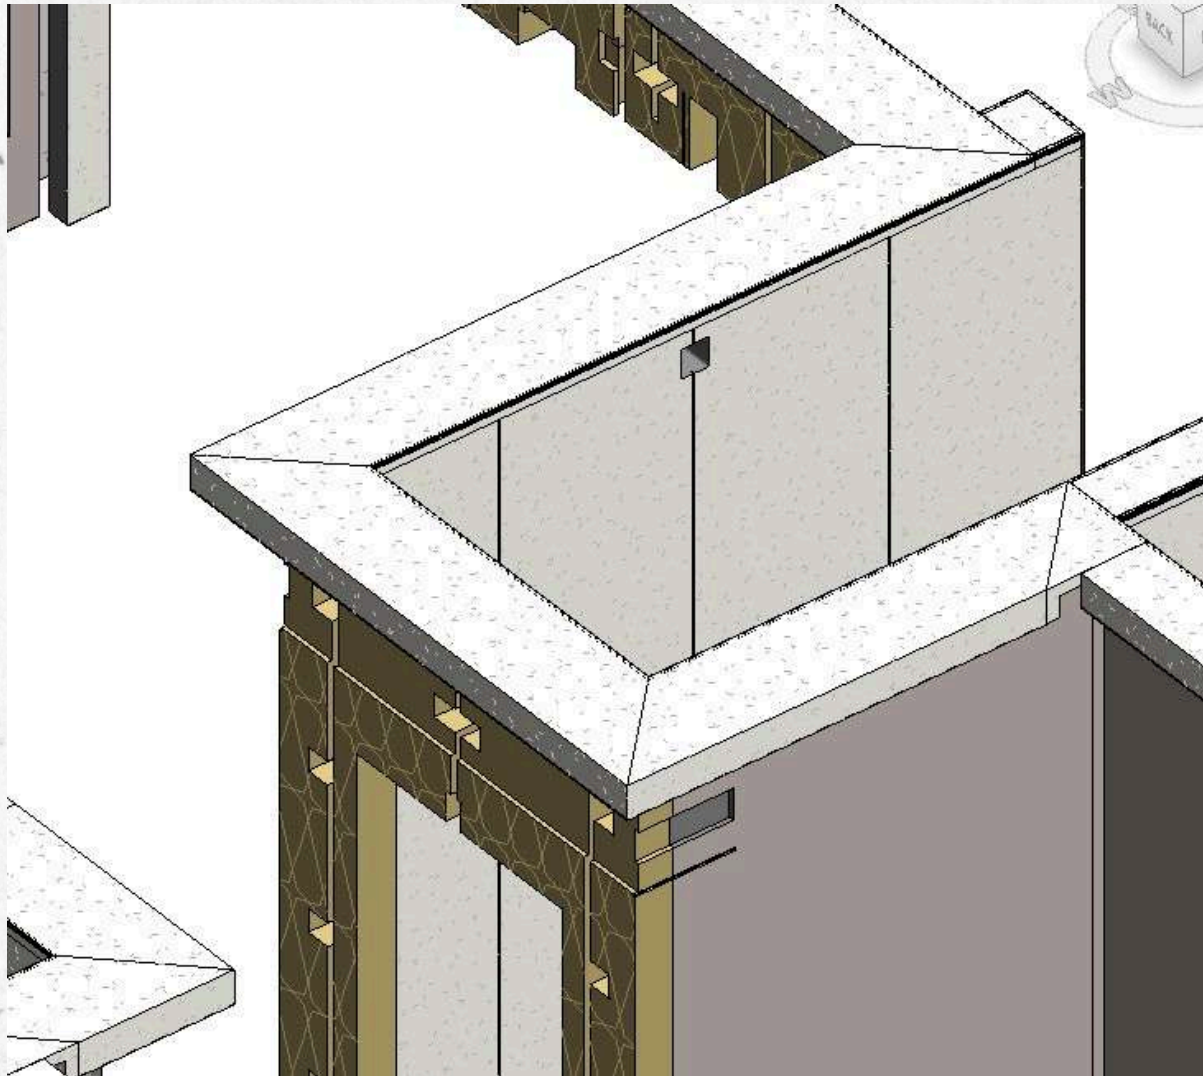

Scope of Work – Coping, Skirting, COBie

- Coping Works: Installation and alignment of stone coping along parapets
- Skirting Works: Application and finishing of skirting at floor and wall junctions as per design specifications.
- COBie Sheet Maintenance: Updating and maintaining COBie sheets to ensure accurate asset data for handover and facility management through BIM 360 Collaboration.

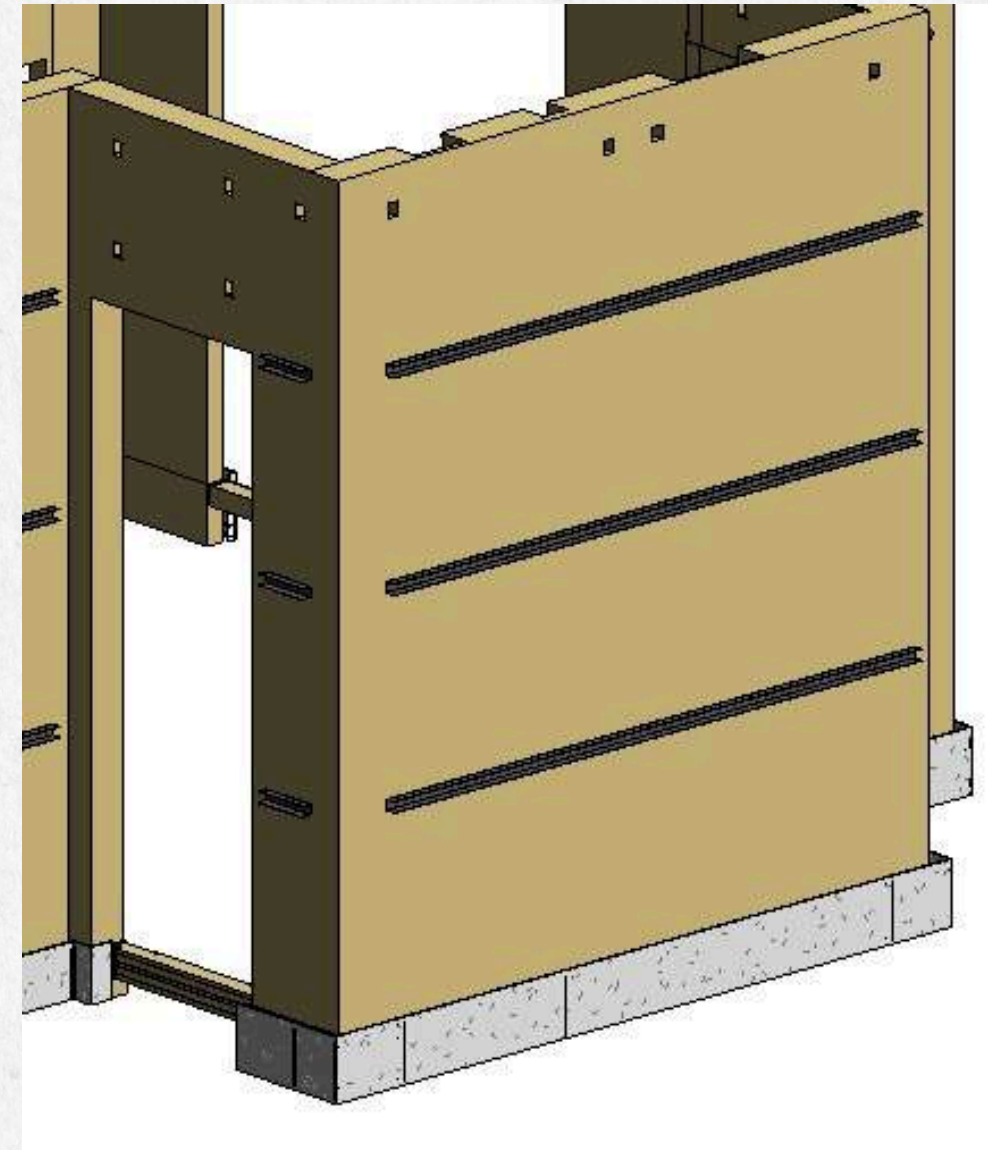

PROJECT 5

ISOMETRIC VIEW- COPING

SKIRTING VIEW- CEMENT BOARD

PROJECT 5

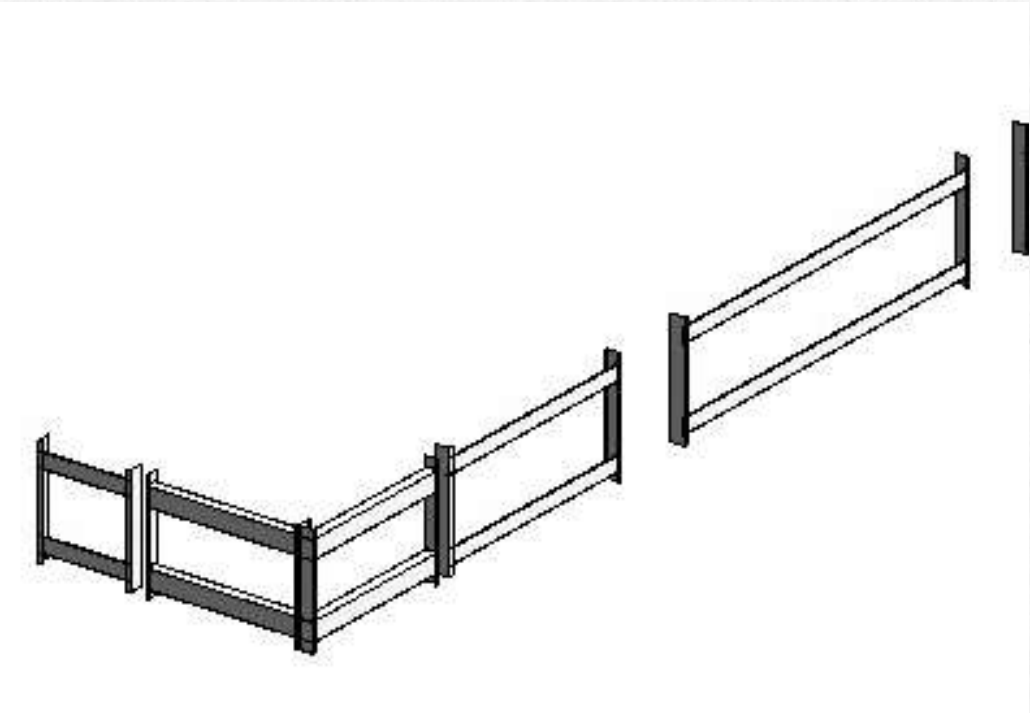

Handled modeling of four main zones (HW1, HW2, HW3, HW4), each representing 30+ areas, including Skirting, Coping. Ensured zero clashes from our contractor's side after coordination and Navisworks testing. Maintained complete and accurate COBie data sheets for all areas.

STEEL FRAMING-DATA

STEEL FRAMING

Update steel framing details such as Element ID, Model Number, Fire Rating, Material Specifications, and other related data as per client requirements and project standards

PROJECT 5

CLASH DETECTIVE

Identified and resolved material clashes through coordination with other contractors. Raised issues caused by others to the client to ensure accountability and avoid delays.

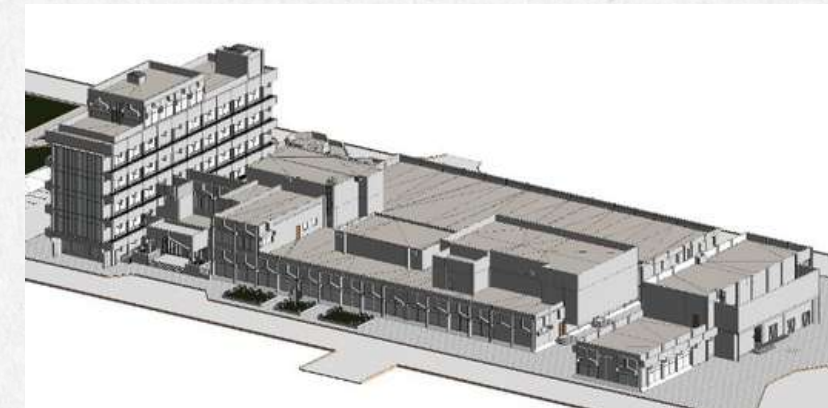

PROJECT 6

Qatar Media Project

- **Scope of Work – The project involves work across three buildings: FM Building, AM Building, and QTV Building.**
- Interior Demolition and Reconstruction
- Existing internal walls are to be demolished.
- New wall layouts will be created as per the CAD drawings provided by the client.

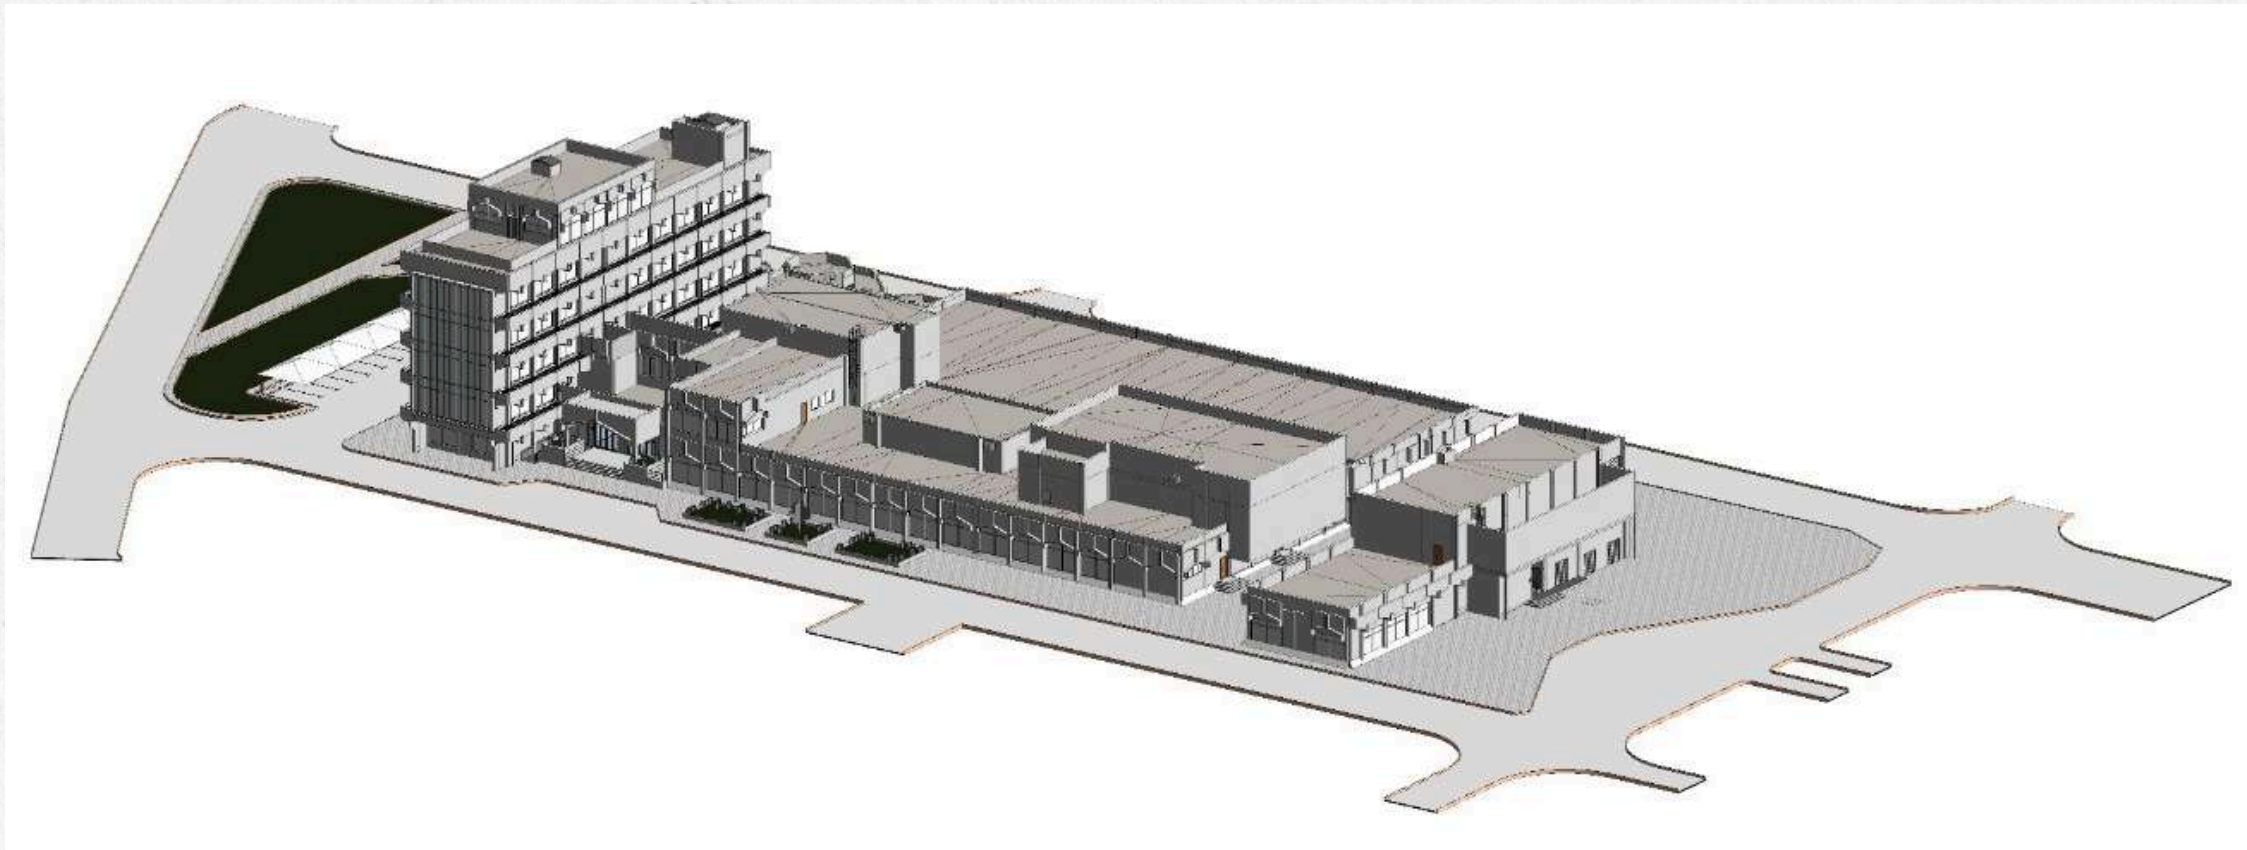

Modeling Scope:

- Floors, Walls, Ceilings, etc..
- Any other relevant architectural elements as per client input.
- LOD-100,200

PROJECT-6

ISOMETRIC VIEW-AM BUILDING

Responsible for creating floor, wall, ceiling, and wall finishes in the AM Building as per the approved CAD files. Ensured accurate modeling and detailing in line with project specifications and client requirements.

PROJECT-6

ISOMETRIC VIEW-FM BUILDING

**Responsible for modeling floor, wall, Ceiling, Wall finishes as per CAD files.
Prepared and maintained COBie data sheets. Performed Navisworks clash tests
to ensure coordination and compliance with project standards.**

PROJECT-6

ISOMETRIC VIEW-QTV BUILDING

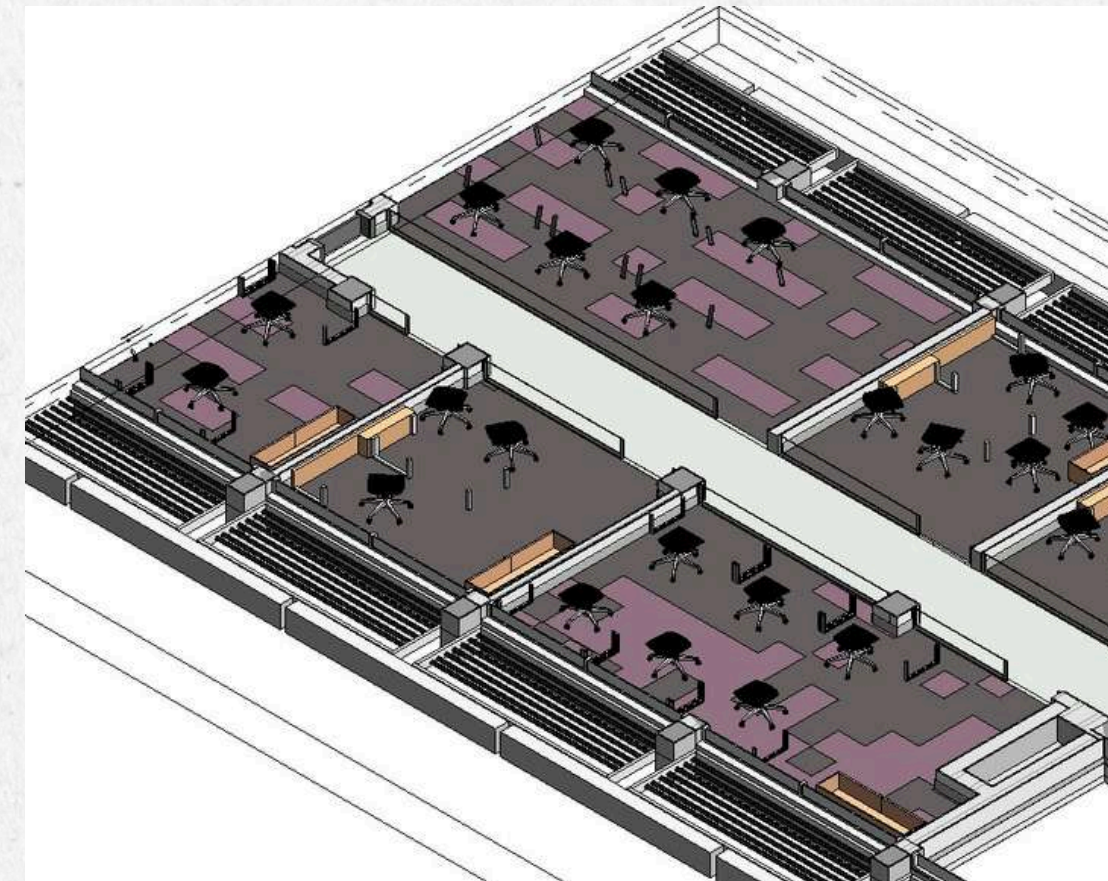

Responsible for creating floors, walls, toilet plumbing features, and accurate placement of tables, chairs, doors, and windows with correct levels. Ensured all elements were modeled as per design intent and coordinated with architectural and MEP requirements for clash-free integration.

PROJECT-6

FLOOR-PLAN

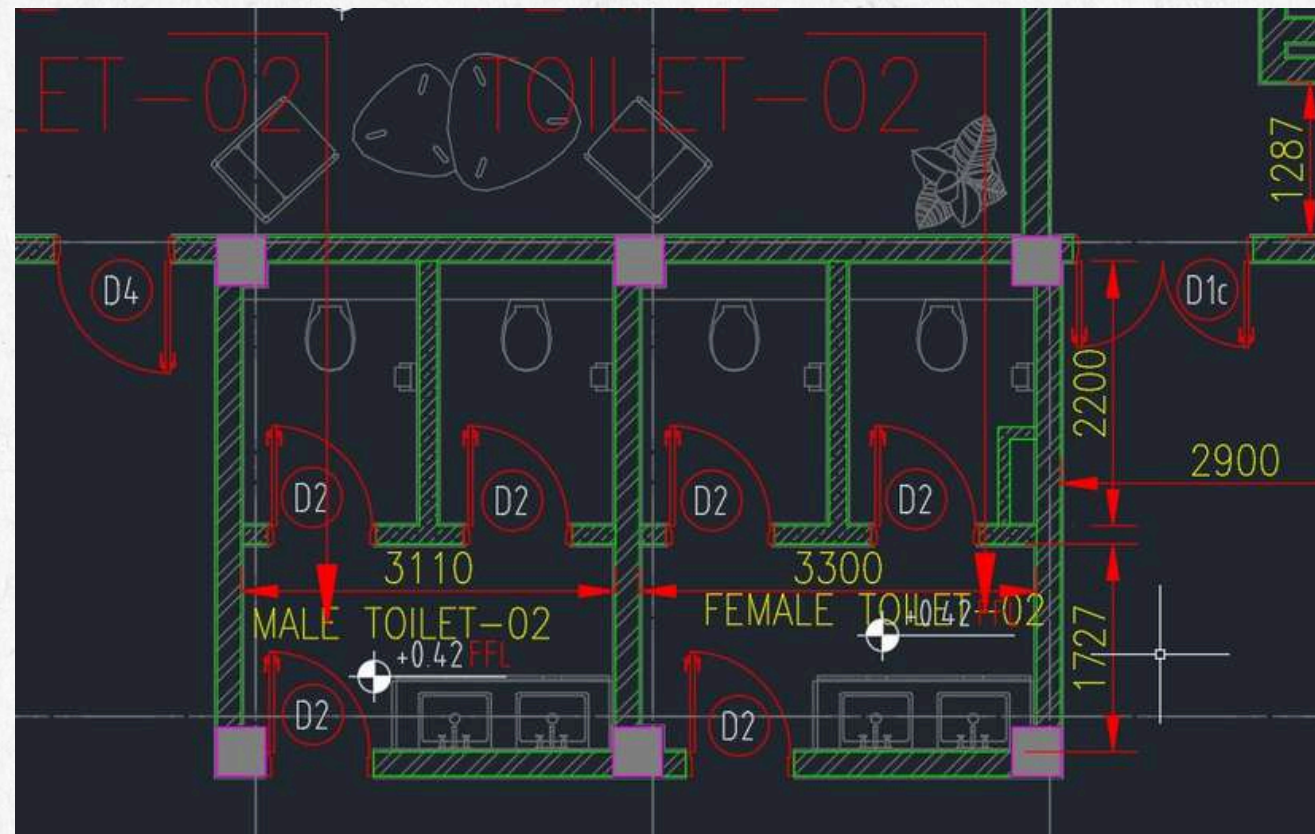

3D-View

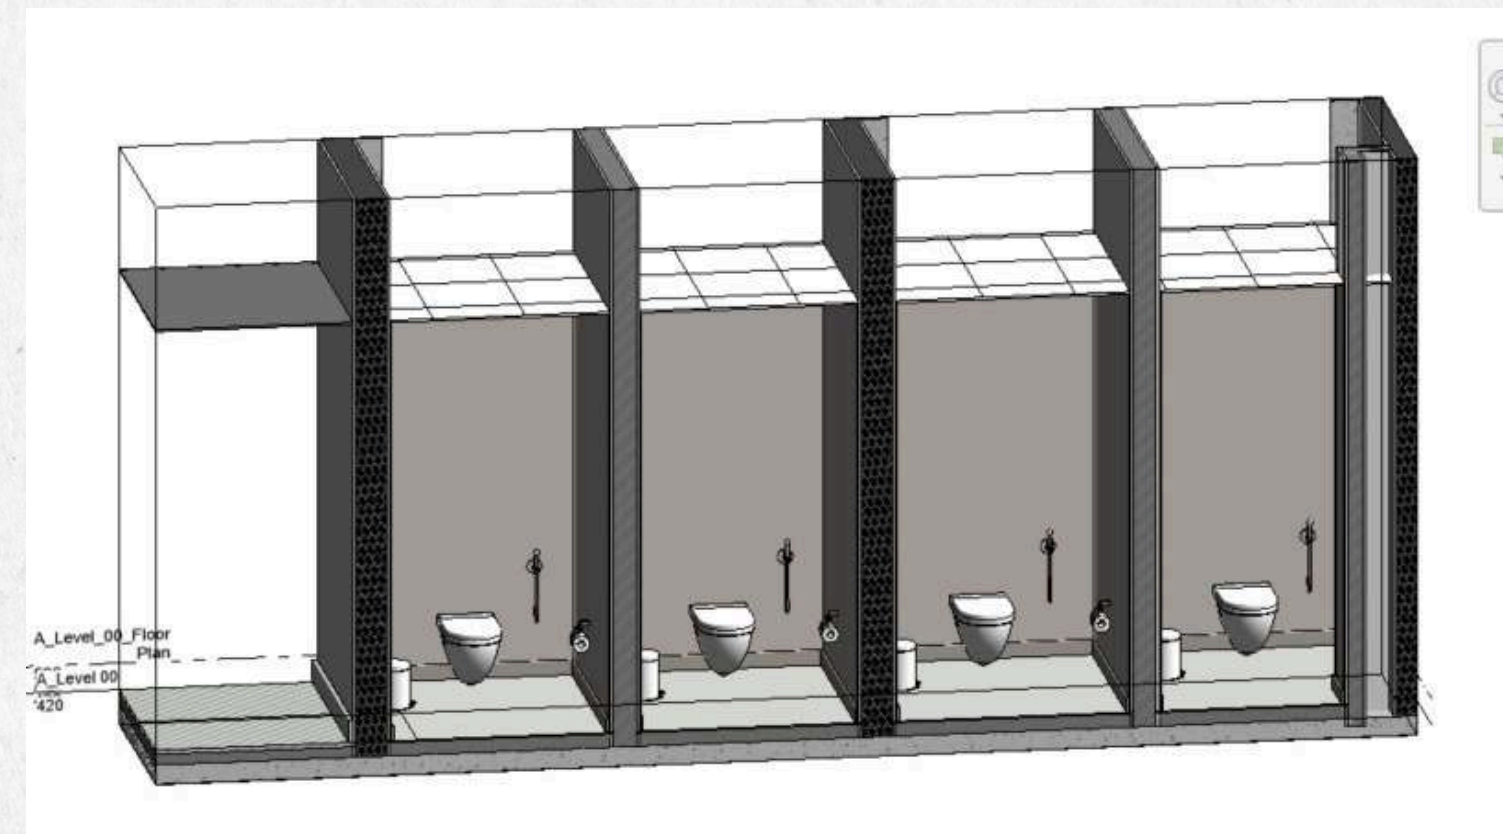

Created floors based on CAD references ensuring accuracy. Applied hatch patterns and colors which were finalized after client approval post-placement.

PROJECT-6

PLUMBING FEATURE -CAD PLAN

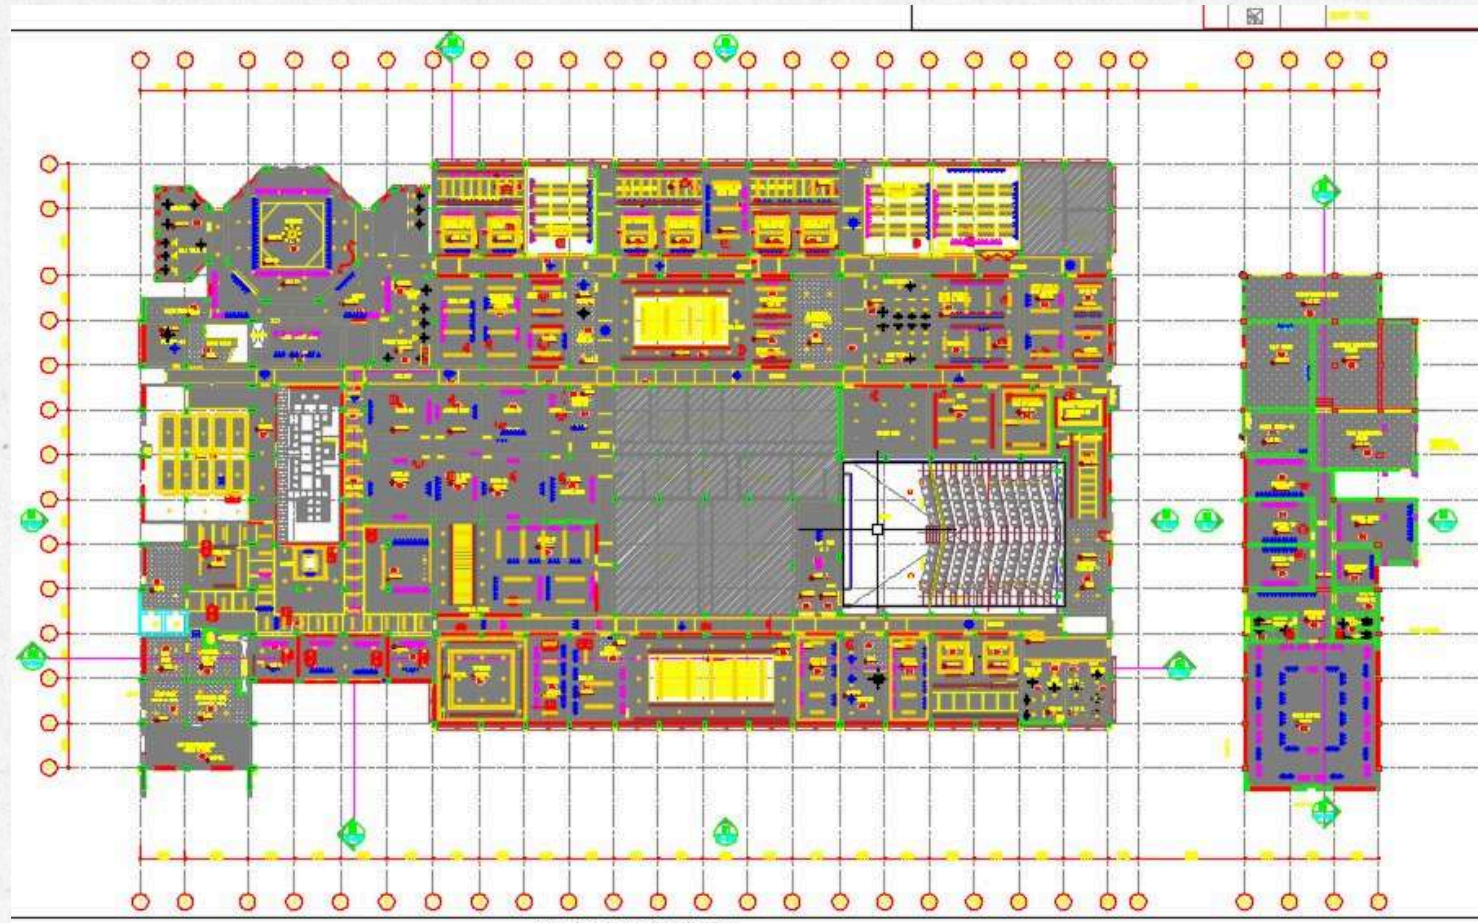

3D-View

Accurately placed plumbing features following detailed CAD references, ensuring alignment with design requirements and seamless integration within the overall building model.

PROJECT-6

CEILING-PLAN

3D-View

Placed ceilings according to CAD detailed drawings and verified levels to ensure correct and precise installation.

LET'S WORK
TOGETHER!
